

NATURAL & HOLISTIC DOG FOOD, CAT FOOD, TREATS & HYGIENE PRODUCTS... DELIVERED DIRECT

HOW TO USE ASPEN WOOD FIBER CAT LITTER

- Place 1 inch of Aspen Wood Fiber Litter in litter pan
- (About 4 lbs of wood fiber litter equals 16 lbs of clay litter and will last up to 3 weeks per cat)

IF CHANGING FROM A CLAY LITTER;

- Place 1" of Aspen wood litter in pan then place ½ " of clay litter on top so that the cat can get used to the wood fiber litter feel.
- Do this a couple times until Cat is comfortable with new litter.

IF CHANGING FROM A CLUMPING LITTER;

- Every time you take away a clump replace it with the Aspen Wood Litter until there is no more clumping litter left.

GENERAL NOTES;

- Remove solids on a daily basis,
- The urine and moisture will break down the pellets into shavings and saw dust, the litter will absorb wetness and neutralize the odor,
- When 2/3rds of the litter is broken down it is time to change by removing the old and replace with 1" of new pellets
- Aspen Wood Litter is virtually dust free
- It can be used, as fertile mulch for flower gardens and is biodegradable and odor free.
